

John Smith CV

John Smith provides failure analysis, marine survey, appraisal and marine claims adjusting services regarding: boats, yachts, small passenger vessels, personal watercraft, trailers, docks, marinas and boatyards. Smith's clients include insurance companies, financial institutions, attorneys and individuals.

Smith served over six years as staff marine surveyor for Jamestown Distributors performing inspections, analyzing problems and offering solutions for yacht, boat, dock and trailer problems. Additionally, he instructed marine professionals and amateurs in the proper use of boat and dock construction and repair products. Smith also provided analysis of new products for market consideration. Furthermore, he established and managed Hazardous Materials Compliance program and OSHA Compliance/employee safety programs for clients.

For more than fifteen years Smith was the owner/manager of Ambler Boat Works; a boat, yacht and personal watercraft repair company providing vessel reconstruction, engine repair and marine survey services to individuals, boat dealers, manufacturers and marine insurance companies. Additionally, Smith has ten plus years experience in steel fabrication as a fabricator, certified welder, inspector, rigger and machinist. Smith also has experience in the recovery of underwater evidence for litigation and insurance purposes.
